DETAILED ACTION

1. This Office action is responsive to the amendment filed 01/76/2006. Claims 1-26 are presented for examination. Any objections or rejections made in the previous office action not specifically repeated below are withdrawn or have been overcome by applicant's response.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyd et al. (Pat. No. 5,895,487).

Boyd teaches the claimed "integrated circuit" as the "node" chip or single chip multiprocessor shown in figure 6. The claimed "first processor" corresponds to one of processors 611-614. The claimed "first dedicated cache" corresponds to one of L1 cache's 621-624. The claimed "second processor" corresponds to a second one of processors 611-614. The claimed "second dedicated cache" corresponds to a second one of L1 cache's 621-624. The claimed "control logic" corresponds to circuitry including L1 cache-coherency and cross-interrogate unit 63. Boyd contemplates directly transferring cache data from one L1 cache to another L1 cache without buffer intervention as discussed at col. 9, lines 20-28. Furthermore, a

cache line can be moved directly from one L1 cache to another L1 cache over the L1 transfer busses.

The examiner believes all dependent claim features not specifically discussed above are expressly or inherently taught by Boyd et al. The remaining dependent claim features, while part of the invention, do not appear essential to the main invention found in the independent claims. Thus, a detailed discussion of claim feature(s) is not warranted at this time. Support for this line of reasoning is derived from 37 C.F.R. 1.105. 37 C.F.R. 1.105 permitting “stipulations as to facts” or “whether a dependent claim element is known in the prior art based on the examiner having a reasonable basis for believing so.”

In the event applicant disagrees with the characterization of certain dependent claim elements as being “expressly or inherently” taught by the reference, applicant must specify exactly what claim elements are considered “novel” or “allowable” and why they are allowable (e.g. the claim feature is not suggested/taught in the art of record).

4. Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. 1.136(a).

5. A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY

ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should review the prior art not relied upon for its relevance to the instant claims. Barroso et al. (2004/0260879) teach an intra-chip switch for transferring between L1 caches.
